Brief portfolio Kevin NGUYEN

I'll try to create a clean & simple Portfolio One Page like with a trendy theme, with minimalist animations, without overloading the page with information and big animation. Mobile-first to take my portfolio with me anywhere.

To start : the site will be named Kevin Nguyen's Portfolio :
-       The header will be fixed, linked towards my differents sections like « About », « Contact », « Work », « Skills » …

-       The front page has some small piece of information about myself and some links towards my professional social network
And right bellow, I'll add more detailed informations, my hobbies, a small paragraph about my background (keeping it clean and simple).

-       The « Project / Work » part will be displayed in a grid 5 x 2, if there are more, I'll add them bellow, the description be will displayed as we hover the mouse over the project.
And a gallery of my several graphic work in a carrousel / coverflow style…

-       A part concerning my skills and my professional experiences, with smalls animations, as I learn more and obtain more skills and do more jobs, I'll add it at the end.

-       At the very end, i'll make a form, clean and simple, with 3 inputs.
 If somebody wants to contact me, i'll also add my socials networks once more in the footer, so that they don't have to go back all the way up.

-       And a very minimalist footer, only my name and mail and phone number.
